About me

Not too long ago, I started to be more aware of what I do, with whom and for whom. Taking a moment to see the whole picture, gives me the chance to decide which path is aligned with the world I want to live in.

Interests

Recently, I got interested in how to connect better with people and have deeper conversations. Playing Basketball is what helps me reduce stress.

Skills

Full Stack Developer

I constantly think of new ideas to create projects that help me learn new tools. My goal is to work with a team in more complex and larger projects that can improve the way we live and interact on this planet.

Job experience

Hausmeister 2020-Present

PSV-Treptow. Berlin, Germany

Moving to Germany I was lucky enough to find a job as a facility manager that gave me the freedom to learn programming after work. I enjoy solving problems and thinking before acting is part of my routine. The best part is that I can contribute by fixing things instead of buying new.

Volunteer 2016-2018

Workaway.info Europe

I decided to push myself to improve my English by traveling around Europe working as a volunteer in different countries, for more than a year. This experience helped me empathize with people from different cultures and figure out how to work together.

Salesman and Designer 2014-2016

Espace + Diseño y vanguardia. Querétaro, México

I improved the quality of presentations for the clients, I learned how to handle multiple projects simultaneously and how to keep them organized from the first contact to the after-sale. Additionally, I helped improve the branding and the showroom with my own design, I trained new designers and I was in charge of a small design team.
